# Red Grandis & Grandis Oak Coating System

A great Oak look at a fraction of the cost

## **Red Grandis** Exclusive to Timbmet

- ✓ EUTR compliant, FSC® certified 100%, plantation grown hardwood
- ✓ Clear, uniform timber with outstanding workability
- ✓ Easily stained or painted
- ✓ Versatile and easy to machine
- ✓ TRADA and BRE tested for durability, flexibility and structural strength
- ✓ Continuity of Supply

## **Grandis Oak Stain** Exclusive to Teknos

- ✓ Outstanding results – Oak appearance
- ✓ Protects against weathering, UV degradation, mould and fungal attack
- ✓ Fully water-based - reduces harmful emissions and disposal issues
- ✓ Rapid application and fast drying minimises work and storage times
- ✓ Easily maintained for lifetime performance

All the benefits of FSC certified 100% Red Grandis with the look and finish of Oak

**TIMBMET**  
Everything wood should be

**TEKNOS**  
Paint with Pride

The Timbmet Teknos partnership now offers Grandis Oak: the perfect Teknos protective stain system for Timbmet's exclusive FSC certified 100% Red Grandis.

Combining the outstanding workability and durability of Red Grandis with Teknos' aesthetic and protective Oak stain. A great Oak look available at a fraction of the cost.

# Why Red Grandis?

## Durable and Fungi Resistant

Independently tested in the UK by TRADA technology achieving Durability Class 2-3 – durable to moderately durable

## Structurally tested

BRE tests prove D35 structural properties and C36 density

## Environmentally Sourced

Responsibly sourced plantation grown FSC certified 100% timber

## All Purpose

Suitable for high end internal and external application including mouldings, window and door frames, furniture and cabinets

## Available as TEC®

(Timbmet Engineered Components)

TEC provides dimensional stability, reduced waste and costs, and a flawless finish. Available in both finger jointed and clear faced production.

# Why Grandis Oak from Teknos?

- Industry leading standards for durability and performance
- Independent testing by BRE show the Teknos system outperforms traditional approaches by inhibiting rot, mould and moisture ingress
- Provides extended protection against weathering, UV degradation and fungal attack
- Fully water based system significantly reduces the harmful emissions and disposal issues associated with many conventional solvent based preservatives
- Rapid application time combined with fast drying to minimise work and storage times
- Propriety technology minimises micro-foaming in the final paint film, extending coating durability
- Simple maintenance keeps joinery performing and looking good throughout its service life

# Responsible Business

Timbmet and Teknos are committed to environmental, sustainable and responsible business solutions.

FSC certified 100% Red Grandis is responsibly sourced from a sustainable plantation in Uruguay. Its certification reflects its proper use of forestry resources and the implementation of specific regulations ensuring the plantations are well managed with consideration for people, wildlife and the environment.

All Teknos factories have quality and environmental management systems, certified in accordance with ISO 9001 and ISO 14001. Joinery coatings are water based, with VOC levels significantly below current and proposed legislative levels, and free of all heavy metal additives.

Timbmet are in full compliance with the new EUTR legislation, having already operated in this way for several years.

## What our customers say...

### **Carna Joinery**

Wayne Davies, owner of Carna Joinery in Pembrokeshire, carried out extensive research to find the perfect timber. After numerous trials, and even treating his own timbers, he believes Red Grandis TEC is the ideal choice:

*"Red Grandis doesn't leach or blacken like Oak and is more cost effective than softwood. It is stable with a straight grain and no knots. As it doesn't move or chip it has excellent working qualities."*

Wayne couples Red Grandis with a Teknos stain.

*"Looking at my windows you would never guess they weren't real Oak. My customers love the results - the stain not only looks great, it also protects my work from the harsh coastal weather."*

He has calculated that switching to Red Grandis TEC has saved him at least 20% on his raw materials and another 30% in labour time.

### **Brookeswood**

Mike and Fran Bryant, who have recently completed a self build in Hertfordshire, explain how delighted they are with their new Red Grandis windows and doors manufactured by Brookeswood. Originally they had intended to install solid Oak windows and doors in a natural Oak finish, but their plans were halted by the conservation officer, who insisted that all the exterior frames be painted in a dark opaque finish.

However, Brookeswood were quick to offer Red Grandis as an ideal solution. Fran Bryant said:

*"Not only did this new option allow us to meet the conservation officer's requirements for the external finish, but at the same time thanks to Teknos natural oak stain developed for Red Grandis, we were able to achieve the Oak finish for the interiors that we had originally intended."*

*"To top it all, we made a significant saving using Red Grandis instead of Oak."*
